

JAYESH GHOSH

2178191684 | jayeshg2@illinois.edu | www.linkedin.com/in/jayesh-ghosh | <https://www.jayeshghosh.com/>

Computer Science and Advertising student at UIUC with product management experience driving AI-enabled enterprise solutions and user-centered applications. Skilled at translating user research into actionable roadmaps, collaborating across engineering and business stakeholders, and delivering measurable impact through data-driven product strategy.

EDUCATION

University of Illinois at Urbana-Champaign

Expected May 2026

Bachelor of Science in Computer Science and Advertising

GPA: 3.86/4.00

Honors: Dean's List (Three Semesters)

SKILLS

Product & Strategy: Product Roadmapping, User Research, Stakeholder Management, Go-To-Market Strategy, Sprint Planning

Technical Development: Python, Java, Swift, TypeScript, React, Next.js, SQL, REST APIs, iOS Development

Data & Analytics: NumPy, Pandas, R, Excel Modeling, Data Visualization, Statistical Analysis, Process Mining

Tools & Platforms: Jira, MS Teams, Git, Power BI, Google Analytics, Gemini API, Firebase

WORK EXPERIENCE

Firstsource Solutions – Enterprise Transformation Team

Louisville, Kentucky

Digital Transformation Consultant Intern

May 2025 – Aug 2025

- Led strategic evaluation of AI-enabled Procure-to-Pay platforms, analyzing vendors across 40 BPO-specific criteria and process-mining 4,350 POs / 4,600 invoices to quantify automation opportunities
- Developed dual-impact AI strategy modeling 70% manual touchpoint reduction and 3-5% total-spend savings through intelligent sourcing and automation, projecting \$2M+ annual ROI for leadership approval
- Designed 90-day implementation roadmap with 4 quick-win initiatives (intelligent invoice processing covering 3,200+ monthly transactions, AI-powered requisition intake) and phased scale-up milestones
- Partnered with procurement, finance, and IT stakeholders across 7 global entities to define future-state architecture and reposition P2P operations from cost center to strategic value driver

EasyDo Tasks – Liberty Infospace

Technical Product Management Intern

June 2024 – Aug 2024

- Conducted user segmentation analysis synthesizing feedback from 150+ early-stage MSME users to validate product-market fit and inform feature prioritization decisions
- Contributed to product roadmap planning and sprint structuring through MS Teams, collaborating with engineering to deliver consistent 3-week sprint cycles while reducing tech debt by 15%
- Collaborated with cross-functional team (engineering, design, QA) to develop and iterate AI-powered customer support chatbot, reducing average initial response time by 12% for SMB customers
- Managed product requirements and feature prioritization pipeline, balancing user needs with technical constraints to ensure sustainable delivery velocity

PROJECT HIGHLIGHTS

RecycleLens – Campus Sustainability iOS App

Aug 2025 - Present

- Partnered with UIUC's Institute for Sustainability to build iOS app addressing 25% campus recycling contamination through ML-powered instant item classification
- Conducted campus-wide user research validating 78% found interface intuitive; designed continuous-scan workflow reducing disposal decisions from minutes to 15 seconds
- Built impact tracking dashboard and retention system applying gamification principles; integrated data visualization enabling students to track sustainability metrics over time

RELATED COURSEWORK

Algorithms & Models of Computation, Consumer Insight, Data Structures, Computer Systems, Advertising and Brand Strategy, Advertising Research Methods, Compilers, Software Architecture, Audience Analysis
